

## Are you on top of your AFSL monitoring obligations?

Gain visibility of potential compliance breaches and operational risks in real time with our new **Key Risk Indicator Solution.** 

With KRIS, you are alerted to any issues in real time so they can be addressed directly from your **customised dashboard.** 

Administrators can create alerts based on indicators of possible issues and their tolerance levels, and monitor these on a daily or **real-time basis**. When a breach is identified the adviser is alerted so they can address the issue.

## Why choose KRIS?

- ✓ \$0 implementation
- ✓ Real time alerts
